Part I of the document provides an assessment of lynx status and risk. An overview of lynx ecology is presented first, followed by identification and description of risk factors. Lynx population status, habitat, and relevant risk factors are assessed for four spatial scales: range-wide, 5 geographic areas (Cascade Mountains, Northern Rocky Mountains, Southern Rocky Mountains, Great Lakes, and Northeast), planning units, and home range. The assessment lays the conceptual and scientific foundation for Part II, the conservation strategy. Part II contains recommended conservation measures that address each of the risk factors. The conservation measures are sorted into programmatic and project level objectives and standards. Additional sections provide guidance for analysis of effect and project conferencing and consultation, inventory and monitoring, and management priorities. This item ships from La Vergne, TN.
