Excerpt: .pipe of one foot diameter was connected, extending a distance of 80 feet from it at right angles and horizontally; the end of this pipe was turned upwards to form a jet, and iron plates fastened upon it, so as to give any form that might be desired to the water issuing. The level of this branch pipe is about 120 feet below the bottom of the aqueduct on the north side of the valley, affording an opportunity for a beautiful jet d eau, --such an one as cannot be obtained at the fountains in the city. From an orifice of 7 inches in diameter, the column of water rises to a height of 115 feet, when there is but two feet of water in the aqueduct. Visitors to the High Bridge can pass and repass upon the top with the most perfect security....
