Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: .distributed, cut by weathered fractures. 11. Pyroxene dacite; east fork Milk Creek; phenocrysts irregularly distributed. 12. Pyroxene dacite vitrophyre; south side Vista Creek; phenocrysts irregularly distributed. 13. Oxyhornblende-hypersthene dacite; Disappointment Peak, oxidized red. 14. Oxyhornblende-hypersthene dacite; Disappointment Peak; medium-sized sample; some diagenetic inclusions. 15. Vitric tuff; mouth of Glacier Creek; large sample; may contain dacite inclusions. and dikes in the Glacier Peak area sample 17. Oxides: Weight percentages by X-ray fluorescence supplemented by methods described in U.S. Geological Survey Bulletin 1144-A Analysts: Paul L. D. Elmore, Lowell Artis, and H. Smith holocrystalline mesostasis of sodic feldspar and (or) alkalic feldspar, quartz, and scattered flakes of palebrown biotite are characteristic of these flows (figs. 35, 36). These patches appear devitrified, but as similar patches occur in flows of all ages, they may not be time dependent. Perhaps they are related to conditions during cooling, such as local accumulations of volatiles. Similar holocrystalline patches are common in the flows of Mount Rainier (C. A. Hopson, oral commun., 1965). MINERALOGY QUARTZ The ubiquitous occurrence of partially resorbed quartz crystals (fig. 37) makes a xenocrystic origin unlikely. In the lavas bearing the holocrystalline groundmass patches, resorbed quartz phenocrysts are commonly surrounded by a halo of holocrystalline material similar to the patches, which suggests that the quartz was reacting with the melt in situ. In a few flows, partially resorbed quartz is surrounded by reaction rims of small crystals of pyroxene. X-ray diffraction studies indicate cristobalite is present in the groundmass...
