Springer. Paperback. Book Condition: New. Paperback. 504 pages. Dimensions: 9.2in. x 6.0in. x 0.9in. This volume contains the proceedings of EMSOFT 2001, the First International Workshop on Embedded Software. The workshop was organized October 8-10, 2001, at Tahoe City, California. The steering committee of the workshop has the following members: Gerard Berry (Esterel Technologies, France) Paul Hudak (Yale University, USA) Hermann Kopetz (Technical University of Vienna, Austria) Edward Lee (University of California, Berkeley, USA) Ragnathan Rajkumar (Carnegie Mellon University, USA) Alberto Sangiovanni-Vincentelli (University of California, Berkeley, USA) Douglas Schmidt (Defense Advanced Research Projects Agency, USA) Joseph Sifakis (Verimag Grenoble, France) The workshop was sponsored jointly by the DARPA Information Technology Office within the MobIES (Model-based Integration of Embedded Systems) program (Dr. Janos Sztipanovits), and by the National Science Foundation (Dr. Helen Gill). The workshop URL is www.emsoft.org. Embedded software is software that interacts with physical processes. As embedded systems increasingly permeate our daily lives on all levels, from micro-copic devices to international networks, the cost-efficient development of reliable embedded software is one of the grand challenges in computer science today. The purpose of the workshop is to bring together researchers in all areas of computer science that are traditionally distinct but relevant to embedded software development, and to incubate a research community in this way. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
